

Kjede med krympeplastanheng og hjerter

Krympeplast er farget med neon Marker, krympet i ovn og satt på et halskjede av plastperler og satengsnor.

Inspiration: 12815

1.

Draw a design on a shrink plastic sheet.

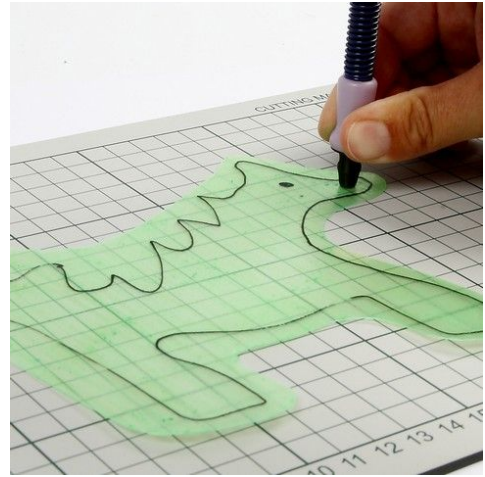

2.

Cut out the design.

3.

Colour in the design with a Stabilo neon marker.

4.

Make two holes in the design.

5.

Put it in the oven at 160°C until the design shrinks – curls up and then flattens again.

6.

Attach a round jump ring in each hole.

7.

Tie a piece of elastic beading cord in each round jump ring.

8.

Thread heart plastic beads onto the elastic beading cord.

9.

Cut a piece of satin cord for the necklace and attach fold-over cord ends onto each end of the satin cord.

10.

Tie the end of the elastic beading cord onto the loops of the fold-over cord ends.

11.

Thread a couple of plastic beads onto the cord to hide the joint.
